- ✓ SWIFTER RESOLUTION OF CLAIMS
- ✓ BENEFIT FROM A POWERFUL TELEMATICS PLATFORM
- ✓ SIGNIFICANT FALLS IN LIABILITY DISPUTE RATES
- ✓ INSTANT ACCESS TO HD 1080P VIDEO, PROVIDING EVIDENCE OF WHAT REALLY HAPPENED

**VT24/7** is VisionTrack's **MONITORED FNOL** solution that sends footage direct to the insurer, broker or dedicated claims team in the event of an incident.

The service, offered by VisionTrack, the multi-award winning video telematics provider, uses the VT2000 connected forward-facing camera at the heart of the system, enabling fleets to manage the insurance claims process more efficiently while maintaining a high-level of duty of care to its drivers.

This monitoring service is designed to significantly reduce claim reporting times. For many organisations, reviewing and responding to multiple alerts can be both time-consuming and costly. Having a dedicated service that handles this process in a responsible and efficient manner can help decrease the overall cost of the claim.

THE UK'S MOST AWARD-WINNING CAMERA TELEMATICS COMPANY

# How It Works

The camera starts by triggering an event through the cloud-based platform. That event is then monitored by our UK-based call centre operators, who will review the linked footage and vehicle data. Each incident will then be either dismissed as a false alert or, if the event is genuine, the footage is emailed direct to the insurer or an agreed list of recipients. Fleets managing their own claims will also receive the footage and will be able to contact the driver, notify the emergency services, if required, and start the claims process.

VT2000 triggers an alert as a result of an incident on the road or if the driver presses the panic button

Alert is managed through the VisionTrack cloud-based platform

Event footage and data are monitored & reviewed by UK-based call centre staff

Decision is made either to dismiss the incident or send to insurer

Footage emailed to insurer or dedicated claims team

The client will have access to VisionTrack's **FNOL video platform**, giving them a detailed overview of each incident.
