SNELLEN EYESIGHT CHART (3M A4)

The attached chart should be printed into a A4 page and use from 3 metres as a starting point before deciding whether a driver's sight should be tested properly.

The instructions are as follows:

"You should stand with your heels 3 metres from the chart in good light, and you can read your Visual Acuity (VA) on the right (numbers on the left if you prefer being "20/20" than "6/6"). The red arrow highlights the "normal vision" line, and the green arrow highlights the approximate driving standard. Please note that this chart is only approximate, and if you are in any doubt as to your fitness to drive you should consult an optician."
